

TREKKING BLACK ROCK LEADVILLE

LEADVILLE

Leadville is probably the closest, and easiest to find, mine in the Gerlach area. It is one mile off Sr34 and almost visible as soon as you turn off the road. Still standing, rather loosely, is a corrugated building and an almost shed. The old ore car trestle piles still stand as well as a wooden loader. The mine is closed up and leaks contaminated water and probably arsenic - looks pretty though. It can be accessed using a family car if you pay attention and take it easy.

119° 29 ' 31.54 " W

Leadville has several interesting places to explore but use caution at all times. AND, stay out and away from the mine. You'll understand when you get there.
